Integrating Zoho Creator

Aim

To integrate Zoho Creator with external services and automate the exchange of data for the Event Registration System using integration features.

Theory

Integration in Zoho Creator allows applications to communicate with external services and exchange data. It can be used to automate activities such as sending notifications, transferring data, and connecting application components with other services.

In this experiment, the Event Registration System is integrated with an email service to automatically send a confirmation notification when a participant successfully registers for an event. The integration uses the registration details stored in Zoho Creator and sends relevant information to the participant.

Procedure

1. Open the Event Registration System application in Zoho Creator.
2. Open the Event Registration Form.
3. Navigate to the Workflow section.
4. Create a workflow that triggers when a new registration is successfully submitted.
5. Add an email integration/action to the workflow.
6. Configure the participant's Email field as the recipient.
7. Configure the email subject as **Event Registration Confirmation**.
8. Add the following information to the email:
   - Participant Name
   - Event Name
   - Event Date
   - Registration Status
9. Save and enable the integration workflow.
10. Submit a sample event registration using a valid email address.
11. Verify that the registration is stored in Zoho Creator.
12. Check the participant's email inbox for the registration confirmation.
13. Verify that the registration details are correctly displayed in the email.

Output

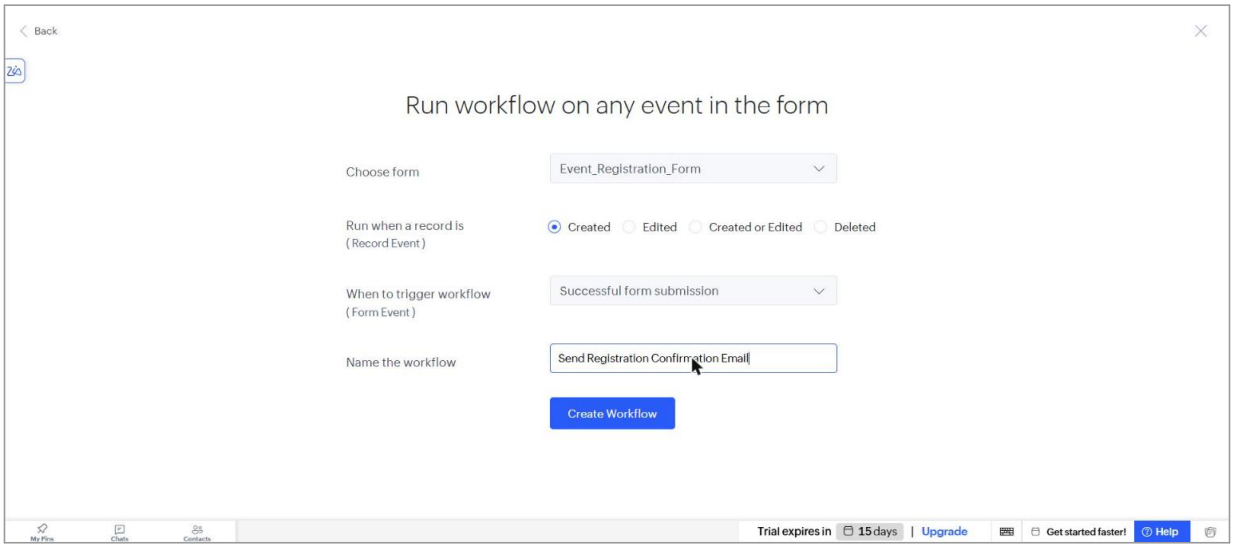

Fig. 7.1: Creating the Email Workflow on Successful Submission

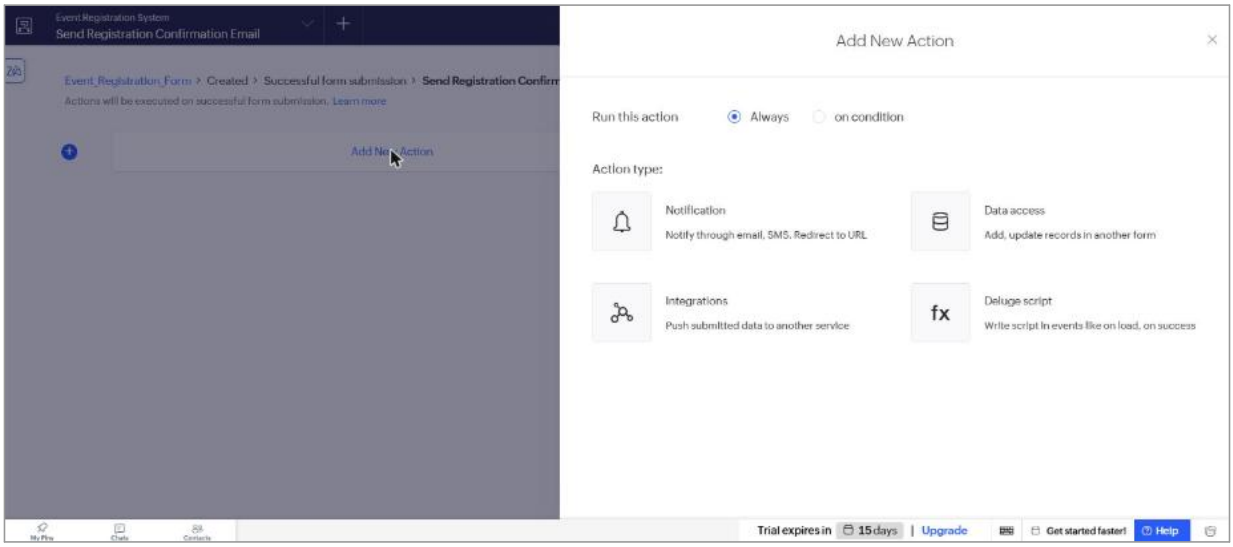

Fig. 7.2: Action Types for Notification and Integration

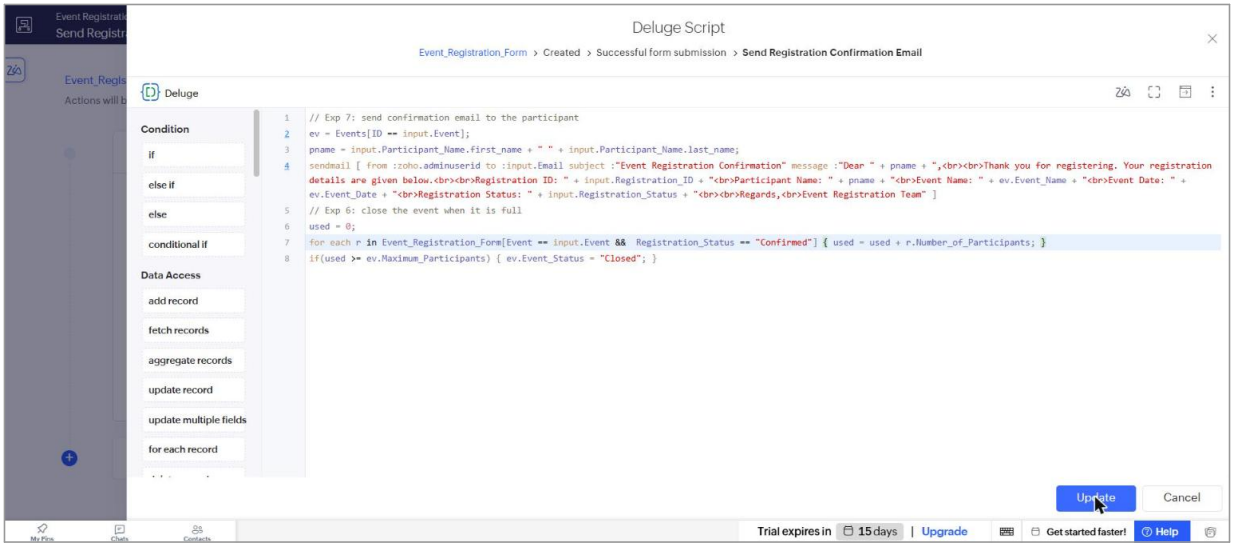

Fig. 7.3: Email Action with Participant Email as Recipient

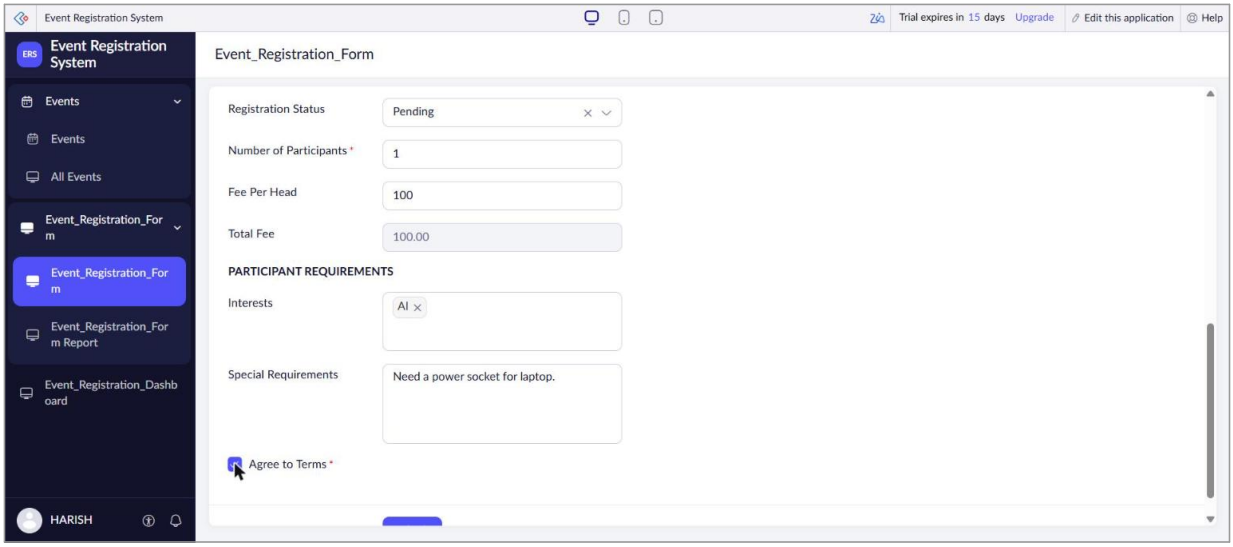

Fig. 7.4: Sample Registration with a Valid Email Address

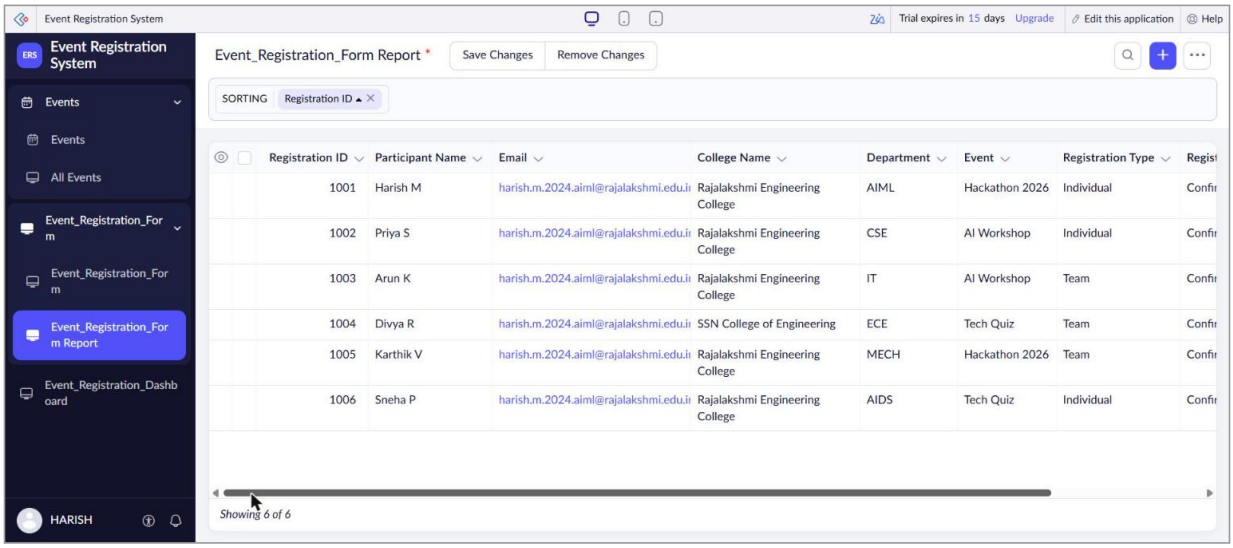

Fig. 7.5: Registration Stored in Zoho Creator

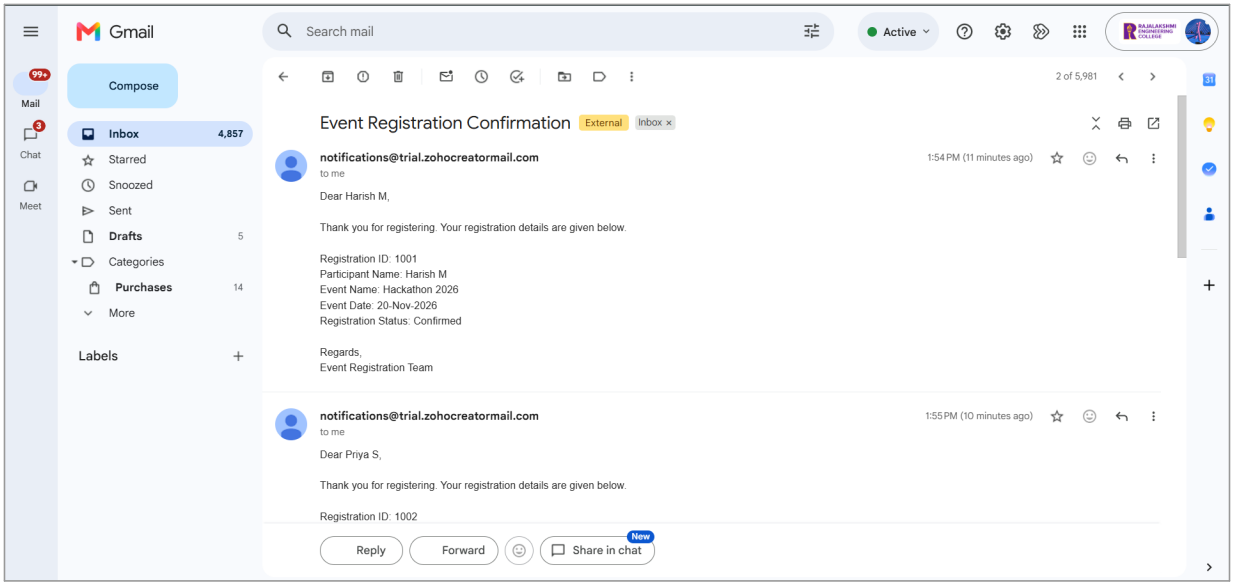

Fig. 7.6: Registration Confirmation Email Received

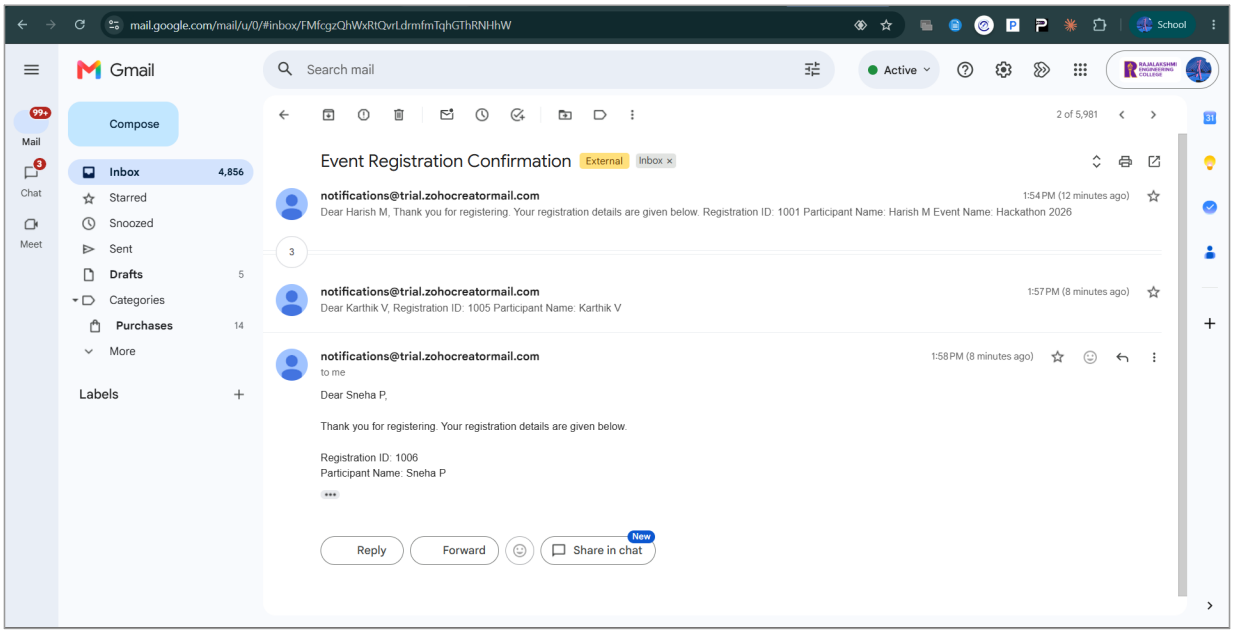

Fig. 7.7: Confirmation Emails for Multiple Registrations

Result

The Event Registration System was successfully integrated with an email service using Zoho Creator. The registration data was successfully stored and an automated confirmation email was sent to the participant after registration, demonstrating the integration capability of Zoho Creator.
